IDENTIFIERS Student Objectives

ABSTRACT

The eight Community College Centers of the San Francisco Community College District are responsible for credit-free and community service educational programs. Since 1972, a biennial study has been conducted to gather data on student characteristics, educational goals, and programs offered. This report summarizes the results of the 1978 Student Information Questionnaire (S.I.Q.) administered at the eight centers. Students are described in terms of various attributes such as sex, age, program orientation, ethnic background, ethnic composition at each center, student military history, previous educational attainment, weekly class hours, employment behavior, and desire for job placement and other services. The S.I.Q. also provides information on use of facilities and services. Results of the 1978 S.I.Q. are compared with results from previous studies, and graphs and tables illustrate trends in age, sex, and race of students, and their occupations and incomes. The distribution of responses on all questionnaire items is presented and results are then compared according to various subcategories, e.g., discipline of instruction, area of residence, student educational objectives, ethnic composition by center, and funding source for each center. Appendices to this report provide survey forms and sample computer printouts. (DR)

1. S.I.Q. – Community College Centers

The San Francisco Community College District includes two operating divisions: the City College of San Francisco, responsible for the credit programs and the Community College Centers responsible for the credit-free and community service programs. There is a significant difference in the two student populations, their characteristics, their goals and programs. There are as well operational differences.

Students at the Centers register in each class using an enrollment form with minimal student identification information. The only demographic data available was age and sex for each Center but not by program. It seemed obvious that more information about our student population was necessary to better meet community needs.

The District Research Office was created in 1972 and its first project was design and implementation of the S.I.Q. A questionnaire with some eighteen questions was administered during a representative week to all students in each class of the Adult/Occupational Division, the predecessor to the Centers Division.

Sampling was ruled out both because of the difficulty in administering the questionnaire to less than a complete class and the difficulty of determining a stratified sample of classes in each Center. We wanted to be able to study characteristics of small populations of students such as those in each discipline or program. Therefore, students were asked to answer two or more questionnaires, one in each class attended. They marked their response to indicate whether it was a first or subsequent questionnaire. In some computer runs, dependent upon intent, only the first response was used and in others, all or duplicated responses.

A cover sheet to describe the class was prepared for each class batch. Each questionnaire was edited, coded and keypunched with the additional coded data identifying the specific class. From computer runs of the responses we were able to determine facts about our students never before possible. Computer runs were made for each Center and all Centers combined. Some runs separated responses by characteristics of the class and some by characteristics of the students. Instructional disciplines and planning area of residence are examples of each kind. Planning areas were determined after converting each student address to Census tract. Instructional Disciplines were determined using the CID (Classification of Instructional Discipline) codes. Although this code structure was not designed for non-credit classes, it has been adapted by the Centers staff. We obtained some basic 1970 Census data structured in the same Planning Areas as our student residence to compare served population with total population. District management found the results of great use both in planning and as a resource to respond to the myriads of requests about our students.

As administrators became familiar with the reports, there was no question but that it should be undertaken again. We felt that the population changes did not warrant an annual study. Consistencies and changes would be more distinguishable on a biennial basis. Some improvements were made in 1974 based on 1972 experience. For example, we decided to approximate Planning Areas using ZIP codes of student residence rather than converting street addresses first into census tracts and then to planning areas.

By 1976 the value of the S.I.Q. was so well recognized that the Chancellor suggested that City College adopt a modified version. College Centers and District staff met to determine which questions would be of value to both divisions. For those attributes which would appear on both questionnaires, questions were standardized. It was administered to all Centers students in each class; its administration at City College is discussed in a separate section.

In 1976 the Centers S.I.Q. was expanded to conduct a faculty load study. The class list derived from the S.I.Q. cards was used as a base for a faculty load analysis at the Centers. This required going back to other sources for attendance, enrollment and faculty assignment data. We found many gaps that could not be closed or reconciled; from the data we did have, we did raise many significant management questions. This resulted in a review of our operations and many management improvements were made. Even this incomplete, sketchy study demonstrated usefulness of a load analysis for the Centers comparable to the one conducted at City College as part of the statewide project called the "Presidents Load Study".

In the spring of 1978, budget cutbacks in the light of the Jarvis-Gann initiative caused serious reflection on the advisability of expending funds for the 1978 S.I.Q. Not only was it then decided to conduct the survey at the Centers and City College, but we determined to expand it to meet the requirements of a valid Centers faculty load study. In addition to a questionnaire for each student in every class, instruments were prepared to cover every faculty assignment in the survey week. This would enable us to produce a more complete and accurate load study. However, as it does not pertain to students, it is not included in this report but has been summarized as a separate study.

This was an ambitious undertaking especially as we did not have the support personnel available in prior years. We hoped that prior experience would reduce associated management problems and we were willing to gamble that we could successfully implement the S.I.Q. We worked closely with the President of the Centers Division and the Directors of each Center to assure the completeness and accuracy of data submitted.

Student editors assured that a class cover sheet identifying characteristics of each class was submitted with each batch of responses, assigned batch control numbers and coded necessary data according to prepared instructions and coding lists. They compacted the five digit ZIP code on each student response to a three digit code from which the computer could then assign a planning area; they scanned all responses to eliminate potential keypunch problems. They checked the coding on the class cover sheets and although the students' work was spot checked, some coding errors undoubtedly do exist. We believe they are random and have no effect on the validity of the S.I.Q. runs.

After editing was completed, the class cover sheet was keypunched and reproduced into each questionnaire response card for that class, assuring that each response would have full class identification. The computer program is a generalized program written especially for the S.I.Q. in 1972 and revised in 1974 when it was run on a different computer model. In 1978 some minor modifications were again made to the program, but unfortunately the computer programming gremlin appeared, with the result that not all the percentage distributions in the computer runs add up to one hundred percent.

The program should count the number of valid responses to each question and then compute the percent distribution for each possible choice omitting invalid responses. For example some students did not indicate their sex whereas others did not respond to age. Blank or invalid characters were to be ignored. They were correctly ignored in the reported number of responses for each attribute but were included in the denominator used to calculate the percent distribution. Thus the parts may add up to less than 100%. In most cases the discrepancy is small, 0.1% or 0.2%, about equal to the rounding error but in a few instances we noted it may be as much as 3 or 4%. In the body of this report, where possible, the percents have been correctly recomputed.

This report summarizes the results of the 1978 S.I.Q. at the Centers. It represents highlights of the survey data, and comparisons with prior studies. However, a major value of the S.I.Q. is to serve as a resource document to respond to policy issues raised, and it has proven invaluable in this regard in past years. Therefore, this report presents as an appendix seven summary runs for the Centers

division. Computer runs for each individual center are in a separate volume, copies of which are available in the Research Office for reference purposes. Because of major programmatical shifts among Centers the comparisons over the years of each Center's students need to be reviewed in that light. The more important value of the individual Center reports is to give each administrator a detailed picture of their students for their use in needs analysis and program planning.

This S.I.Q. report could not have been published without the active support of many individuals. Whereas the first study in 1972 was looked upon as a necessary nuisance the District Office imposed on the field, by 1978 the request to continue the S.I.Q. came, in large part, from the field. The Chancellor Superintendent agreed that it was a vital planning tool that should be continued. With Proposition 13, needs assessment and planning are even more important. Without the cooperation of the administration and faculty this study could not have been conducted in the manner that it was. All users of this document are indebted to the faculty and specially to the students for completing the questionnaires. As Proposition 13 budgeting left my office without staff, obviously the fact that this report is produced at all is indicative of the efforts of many people. My thanks. The taxpayers of San Francisco should find the money well spent and should be proud of the students described in this report.

2. Overview of Students – Community College Centers

The technique used here to describe the student body of the Community College Centers is to state the proportion of the student body with each attribute. If the reader wants an estimate of the actual number of students with that attribute, then he may apply it to 32,759, the fall 1978 enrollment count of unduplicated students. Thus as will be noted 41% of the students are men and 59% women. Applying these percentages we would estimate 13,431 men and 19,328 women. According to enrollment data which is recorded separately for men and women, there are 13,164 men and 19,595 women, a negligible difference for our purposes.

- Six of every ten students are women

men	41.0
women	59.0
Total	100.0

- Students 20 and under are about equally divided among men and women. As students get older there is a larger proportion of women with more than 3 times as many women as men in the 65 and older group.

Age	Men	Women	Total
20 and under	50.0	50.0	100.0
21 – 34	45.2	54.8	100.0
35 – 54	39.7	60.3	100.0
55 and older	27.6	72.4	100.0

- The average or mean age of students is 37. The median age, that is half are younger and half are older, is 32. Nevertheless, the modal age of students is 20, that is there are more 20 years olds than any other age, although not very different from the number in each age year from 18 to 34. On the average, women are older than men students.

	Average or Mean Age	Median or Midpoint Age	Mode or Most Usual Age
Men	34.1	30	20
Women	39.2	33	28
Total	37.1	32	20

- One in eight students is 20 or younger and another one in eight is 65 or older. About two of every three students are in prime working age of 21 through 54.

Age	
under 18	1.9
18 – 19	6.8
20	3.6
21 – 24	13.5
25 – 34	31.2
35 – 44	14.3
45 – 54	9.0
55 – 59	4.1
60 – 64	3.5
65 and older	12.0
Total	100.0

- Age pattern varies by Center. Four Centers have more than 1/3 of their students under 25 and one Center, Galileo, has 1/3 of their students over 60.

- Women are in all programs but the traditional pattern is observed; in the engineering disciplines only 10% of the students are women compared to 80% in Health Education and Consumer Education Disciplines.

- The program orientation shows up in the composition at each center. Galileo with highest concentration of programs of special interest to seniors has 70% women students, whereas John O'Connell with technical and apprentice programs has only 15% women students.

- Ethnic background of students is as diverse as the population of the City of San Francisco. Sixty percent are ethnic minorities compared to 47% in the city-wide population. Chinese account for the largest minority group or 20% of all students, about twice what might be expected from the total population. All other Asians and Pacific Islanders account for another 13%. The Black student population is 11%, slightly below what might be expected and Hispanic 15% compared to 13% in the City. Note that City population is based on the 1970 Census with some adjustments but the Census is known to undercount the minority population.

	Students	San Francisco
Alaskan Native	.1	–
American Indian	1.0	0.5
Black (not Hispanic)	10.7	14.5
White (not Hispanic)	39.8	53.0
Hispanic	15.2	13.3
Chinese	20.5	9.5
Filipino	4.2	5.6
Japanese	2.0	1.7
Southeast Asian	3.4	–
Other Asian/Pac. Isl.	3.1	1.9
Total	100.0	100.0

- Considering duplicated enrollment or student seat count, that is counting a student in each class he/she attends, ethnic minorities increase from 60% to 66% indicating that, on the average, they are taking more courses per student than white students.

- The ethnic pattern at each Center varies as does the geography of the City. 92% of all students at Chinatown/North Beach Center are Chinese whereas 66% of Mission students are Hispanic. However, Chinese and Hispanics attend all Centers, with only half of them concentrated at the Chinatown and Mission Centers respectively.

Percent Distribution within two Centers

	Chinatown	Mission	All Centers
Black	–	12.2	10.7
Chinese	92.5	1.7	20.5
Hispanic	1.3	66.4	15.2
White	1.2	10.8	39.8
All Others	5.0	8.9	13.8
Total	100.0	100.0	100.0

- 12.1% of all Chinese students attend Alemany and 13.5% attend Galileo. 13.9% of all Hispanics also attend Alemany with next largest group 9.7% attending John O'Connell.

- Most Black students, 28% attend John Adams with 20% at Galileo; their greatest concentration is at the Skills Center where they represent 26% of the student population; at the Downtown Center they contributed to 16% of the limited fall enrollment.

	Black	Chinese	Hispanic	White	Total
Alemany	0.5	12.1	13.9	3.8	10.1
Galileo	20.2	13.5	8.5	52.6	29.2
John Adams	28.2	8.5	9.2	15.9	15.0
Mission	12.9	1.0	49.4	3.1	11.2
O'Connell	17.0	6.5	9.7	16.3	12.8
Chinatown	–	49.2	0.9	0.3	10.9
Skills	13.1	6.5	5.4	2.1	5.4
Downtown	8.2	2.7	2.9	5.9	5.4
All Centers	100.0	100.0	100.0	100.0	100.0

- Filipino students, a growing segment of the San Francisco population, are 4.2% of all students and 15% of the Downtown Center student population.

- More than half of all white students attend Galileo, 71% of whose students are white.

- About half the students are native born with another 41% naturalized citizens or permanent residents. The number with student visas is negligible.

	%
Citizen-Native Born	51.0
Citizen-Naturalized	11.0
Permanent Resident	30.3
Visitor Visa	1.0
Student Visa	.6
Refugee Visa	4.4
Other Visa	1.6
	100.0

- There is large variation at each center dependent upon the program. Less than ten percent of the students at Alemany and Chinatown are citizens. Most are permanent residents with "green cards". More than one of every four students at these Centers is on a refugee visa, probably most of whom are Vietnamese. 22% of the Alemany students identified themselves as Southeast Asians.

- Ninety percent of the students had no military service; of those that did, about 45% served in Vietnam or post-Vietnam Era.

Prior to World War II	.7
World War II	2.1
Between WW II & Korea	.3
Korean Conflict	1.0
Between Korea & Vietnam	.9
Vietnam Era	3.1
Post-Vietnam	.9
Non-US Military	1.3
No Military Service	89.7
Total	100.0

- 9.2% of O'Connell students are Vietnam Era veterans. This accounts for 40% of all Vietnam Era veterans who attend the Centers.

- About two-thirds of the students educated in this country have a High School degree or certificate; almost one in four have already earned a college degree, and another one in four have not received even an elementary school diploma.

	Educated in U.S.	All Education
Foreign Education	–	22.2
Elementary	8.3	6.5
High School	31.7	24.7
GED or Certificate	3.2	2.5
Occupation Certificate	4.9	3.8
Junior College	6.5	5.1
College or University	16.2	12.6
Post Graduate	6.5	5.1
None	22.6	17.6
	100.0	100.0

- Half our students take more than six hours of class each week with 25% taking 10 or more hours. This varies considerably from center to center. At the Downtown Center, primarily Civil Service courses, almost 1/3 take only two hours of class and another one third take 3 or 4 hours weekly. The students at Alemany or Skills Center are more apt to be full time students with almost half in class more than 18 hours a week.

Hours Per Week		Cumulative
1 – 2	11.0	11.0
3 – 4	22.8	33.8
5 – 6	18.2	52.0
7 – 9	8.1	60.1
10 – 11	14.2	74.3
12 – 15	6.9	81.2
16 – 17	.9	82.1
18 – 23	7.9	90.0
24 – 30	6.6	96.6
31 or more	3.3	99.9
	100.0	

- The Muni system is the most usual means for getting to class, especially for Skills Center and Alemany students, 73% and 66% respectively. About 1/3 of all students drive to class with almost 2/3 of John O'Connell students driving. More than half of the students at Chinatown walk to school as do 27% of the students at Mission.

Car	32.2
Car Pool	2.8
Bus or Streetcar	39.8
BART	1.0
Bicycle	0.5
Walking	21.7
Motorcycle	0.6
Other	1.5
	100.0

- 87% of all students expect to continue their education the following year. That is encouraging as 36% were attending their first class in the Division. Ten percent had taken classes more than two years ago. Surprisingly 8% reported they attended classes last summer when only a few special classes were held. A more complex study is required to analyze persistence patterns.

- Student goals indicated a strong occupational interest but recognizing the need for basics first; 22% want to learn English and 15% life skills; six percent want a high school diploma. Thirty percent were taking courses directly related to present or future jobs and only one in four signified that they want to broaden their background, the questionnaire wording for general education and community service courses. Considering duplicated or seat counts, then only one in five are taking courses to broaden their background.

Reason for Class	Individual Students	Seat Count or Duplicate
High School Diploma	6.2	7.9
College Prereqs.	1.6	2.1
Entry Level Job	8.2	9.9
Better Job	10.4	9.7
New Occupation	4.5	4.3
Determine Ability	6.0	5.7
Reenter Job Market	1.6	1.8
Learn English	21.7	24.7
Learn Life Skills	15.1	13.2
Broaden Background	24.6	20.7
Total	100.0	100.0

- This question is specially interesting in light of breakdown of class categories. Five percentage points or about 20% more students are in "defunded" or "Community Service" programs than are taking courses to broaden themselves which indicates that for a large group of students, general education courses serve basic and occupational purposes. 27% of these students attended courses classified occupational or apprentice by administrators which again confirms that for some students, their personal goals are somewhat different from the usual course goals.

- About one third of students responding desired no student services. Job placement was the one most frequently desired and at most centers. At John Adams job placement and child care needs were about equal. As respondents could make only one choice, it should be recognized that the demand for each service would be somewhat greater than indicated.

Career Guidance	11.5
Educational Program Planning	11.8
Job Placement	19.4
Child Care	4.9
Financial Aid	6.6
Other	13.4
None	32.5
	100.0

- Almost half our students are now working, with another one in ten looking for work. 13% are full time students, presumably those taking 16 or more hours of class each week. About one in four students are not now in or potentially in the labor force. They include those who are either retired or at home.

	Occupation	Now Employed
Federal Govt.	3.1	5.7
State Govt.	2.5	4.6
City Govt.	5.1	9.2
Private Business	31.5	57.4
Self Employed	4.7	8.6
Non Profit Agency	3.1	5.7
Other	4.9	8.9
Not Employed Now	45.0	–
	100.0	100.0

- The Downtown Center, operating only limited programs during S.I.Q. week, included the Civil Service College. It served about 40% of all those students employed by the City. A like proportion of Federal employees were served by Galileo. (The kinds of programs offered at centers, which might influence the demographics of their citizens, will be discussed in a later section).

- Of those currently working, some 35% attributed training for their current job to an educational institution, about one third of whom acknowledge the SFCCD. Prior work experience and on-the-job training accounted for more than half.

Job Training	All	Now Employed
High School	2.4	4.1
City College	1.7	2.9
Other College	8.0	13.7
Centers Division	6.6	11.3
Other Adult Schools	1.8	3.1
Military	.8	1.4
Prior Work Experience	13.5	23.0
On-the-Job	17.8	30.5
Other	5.9	10.1
Not Employed Now	41.6	–
	100.0	100.0

- As the question pertained to current employment only, the direct importance of SFCCD training can be expected to be much greater than indicated. One might assume that certainly one third of those who acknowledge on-the-job training and prior work experience also received the training for those positions as a result of classes in the District. This would seem to indicate appreciation of SFCCD education for continuing education towards career advancement.

- Schools were very ineffective in job placement. Friends and relatives were most important referrals, followed by direct job request to employer.

	All Students	Now Employed
School-Instructor	1.3	2.3
School-Counseling	2.5	4.5
Friends, Relatives	16.1	29.1
Private Agency	3.0	5.5
Public Agency	4.4	8.0
Direct to Employer	13.8	24.9
Newspaper	3.1	5.6
Union	3.7	6.7
Other	7.4	13.3
Not Employed Now	44.6	–
	100.0	100.0

- These responses indicate that job placement services are even more necessary for those who don't have the personal contacts or initiative, specially in light of the response which indicated one of every five students did want job placement services. As only one in ten were now seeking employment, it does indicate the desire for career advancement of our students.

- Students come from diversified economic backgrounds, some 20% reported no present income whereas 17% reported over $15,000. The median income for the student, and spouse if married, is about $7,000. The Bureau of Labor Statistics Poverty level for the average family unit is about $5,000.

		Cumulative
No Present Income	19.7	19.7
$ 999 or less	5.4	25.1
$ 1,000 – 2,999	7.6	32.7
$ 3,000 – 4,999	11.7	44.4
$ 5,000 – 9,999	18.8	63.2
$10,000 – 14,000	13.5	76.7
$15,000 – 19,000	7.8	84.5
$20,000 – 29,000	5.8	90.3
$30,000 or more	3.2	93.5
Did not state	6.4	99.9
	100.0	

Site Type

- The S.I.Q. provides information about use of facilities as well as student characteristics. 25% attended class at the main building of the Center. Another 7% used district facilities under operational control of a different Center or City College. Some 20% attend classes at a Unified District school building, primarily Galileo. About as many attend classes in Church buildings.

		Duplicated
This Center's Admin. Bldg.	24.2	31.0
Other Center's Admin. Bldg.	5.2	4.7
City College	2.2	1.9
Unified School Dist.	20.1	16.6
Government Bldg.	10.1	10.2
Church	17.9	15.7
Civic, Comm. Center	11.7	12.7
Commercial or Private	8.3	7.0
Other	.3	.3
	100.0	100.0

- When students are counted in each class, or seat count, then the reliance on our own facilities increase. This is primarily because of type of programs offered in our facilities.

Class Frequency

- About 30% of all persons attending our classes go to class five days a week and those persons generally attend more than one class.

- Counting students in each class they attend, the duplicated enrollment, then 40% attend five days. Based on class seat count, about one in four attend classes only on one day, Friday and Saturday being the least popular day. It is not clear from these figures whether students don't attend Friday classes because they are not offered or vice-versa.

		Duplicated
Monday	7.9	6.0
Tuesday	7.6	5.9
Wednesday	7.2	6.0
Thursday	6.0	5.3
Friday	2.1	2.0
Saturday	0.8	0.9
Any Two Days	24.1	21.4
Any Three Days	3.2	3.8
Four Days	10.0	8.8
Five Days	31.1	39.8
	100.0	100.0

- Most classes are in the morning followed by those starting between 6:00 and 8:00 P.M. However, there is great variation among Centers; nearly 60% of Alemany students attend morning classes whereas a like percentage of O'Connell students attend evening classes. Except for O'Connell and the Downtown Center, 3 – 6 P.M. seems a dead time for classes.

Morning	40.8
Noon – 2:55	14.4
3:00 – 4:25	3.0
4:30 – 5:55	4.4
6:00 – 7:55	36.6
8:00 and later	.8
	100.0

- About three of every ten students are in classes which do not qualify for state support. They include largely the general education and senior citizen programs at Galileo and Parent Education at John Adams.

		Duplicated
State, ADA	68.8	73.5
Defunded, Community Service	28.8	23.6
CETA	.7	.7
Other Contract	1.7	2.1
	100.0	100.0

- The course categories upon which funding determination are made have been obviously miscoded in several instances. Mission and O'Connell have students in "all other" category, yet correctly record no community service classes.

Bilingual	4.6
Handicapped	3.0

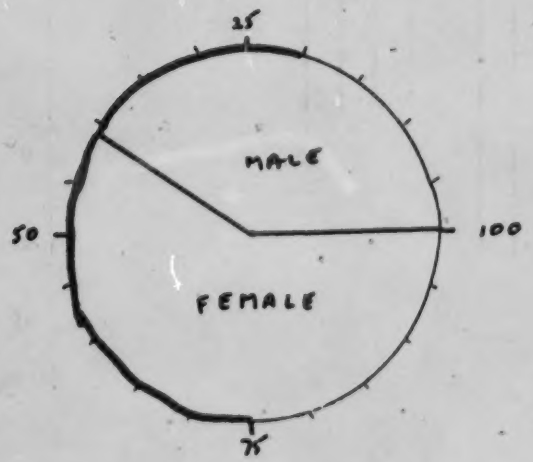
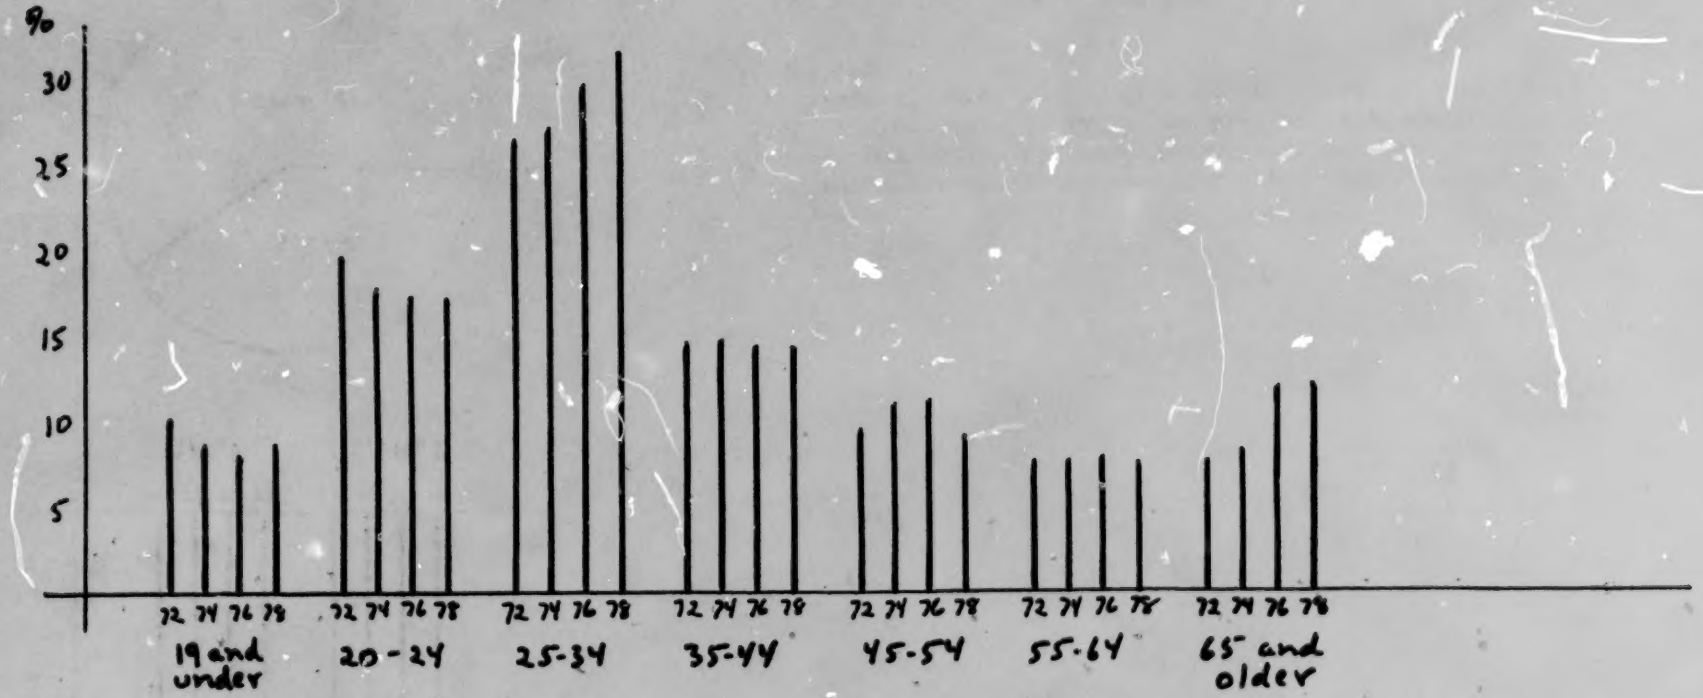
3. Historical Perspective – Community College Centers

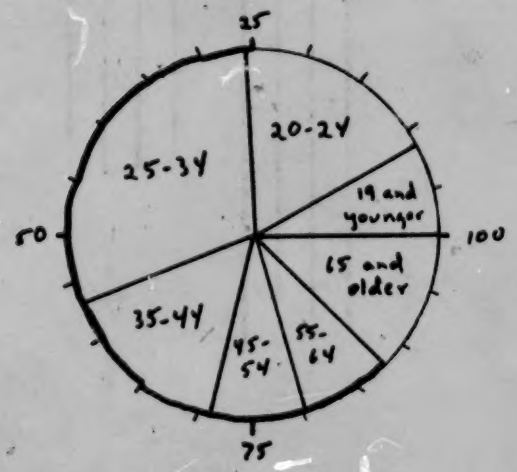
Although the methodology has been quite consistent since the S.I.Q. was initiated in 1972, improvements have been made in the implementation and thus more reliable results obtained. Nevertheless, comparisons may be made over the eight year period. Slight variations between years is not significant in themselves, but they are if a consistent trend is indicated over the period 1972 to 1978. They are illustrated in the series of charts following. Table summarizes questions and responses for each of the four survey years.



SEX

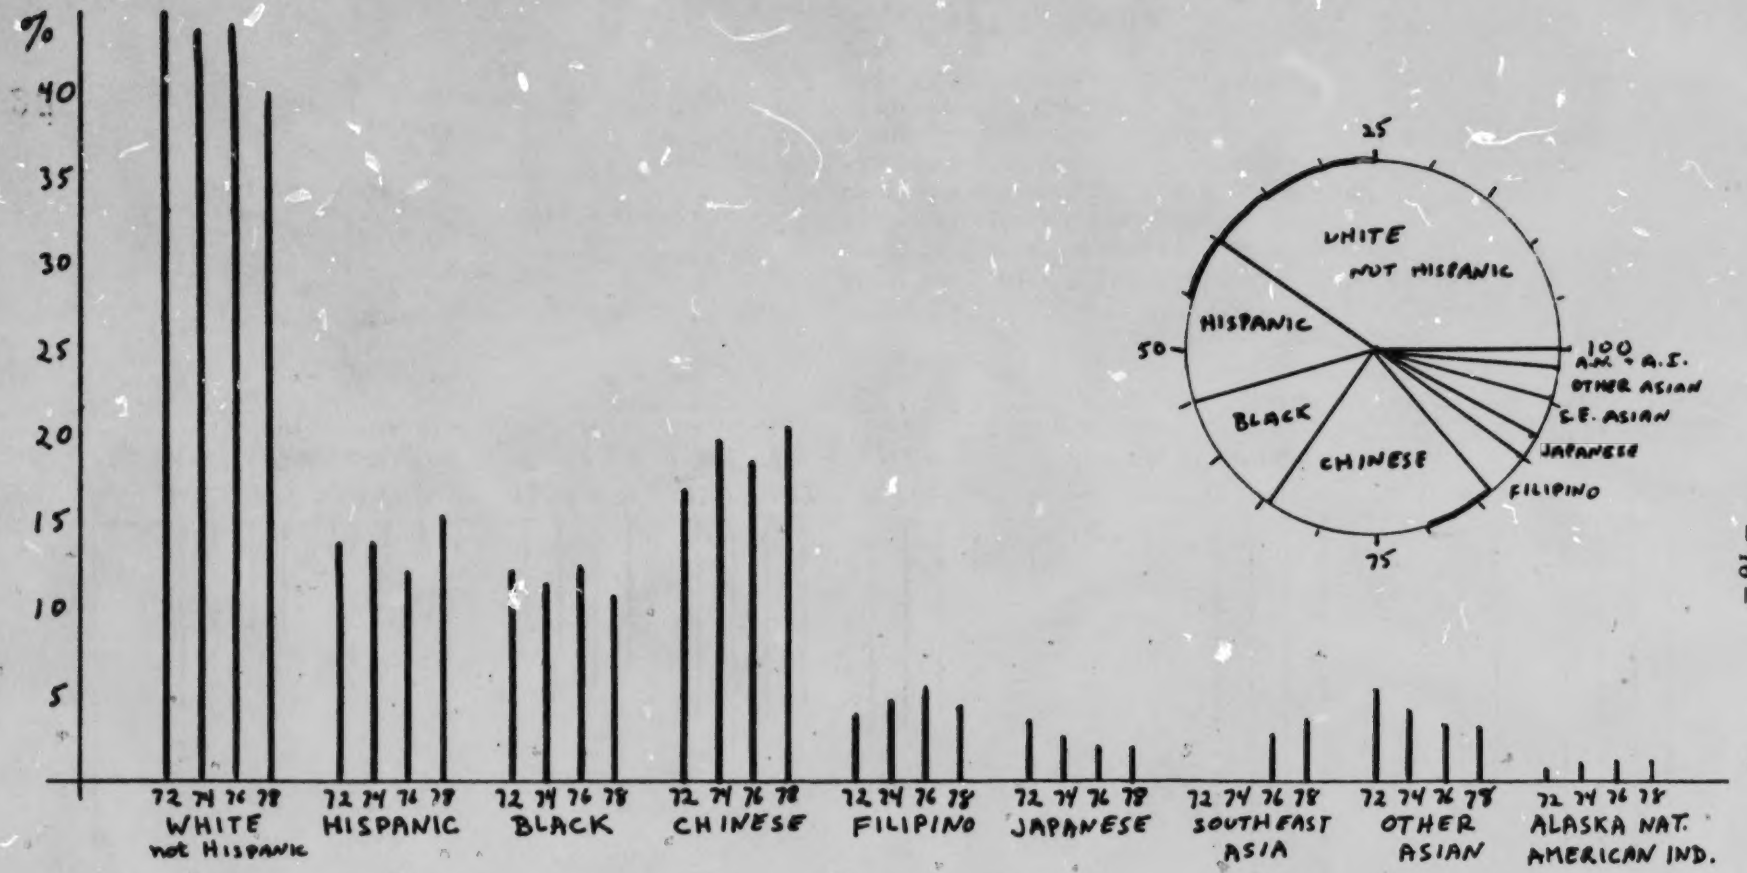
- Three women for every two men studying at the Centers.
- Although percentage of women respondents has been increasing slightly since 1974 it is not as high as obtained in 1972
- Percentage of women varies from Center to Center based on programming.



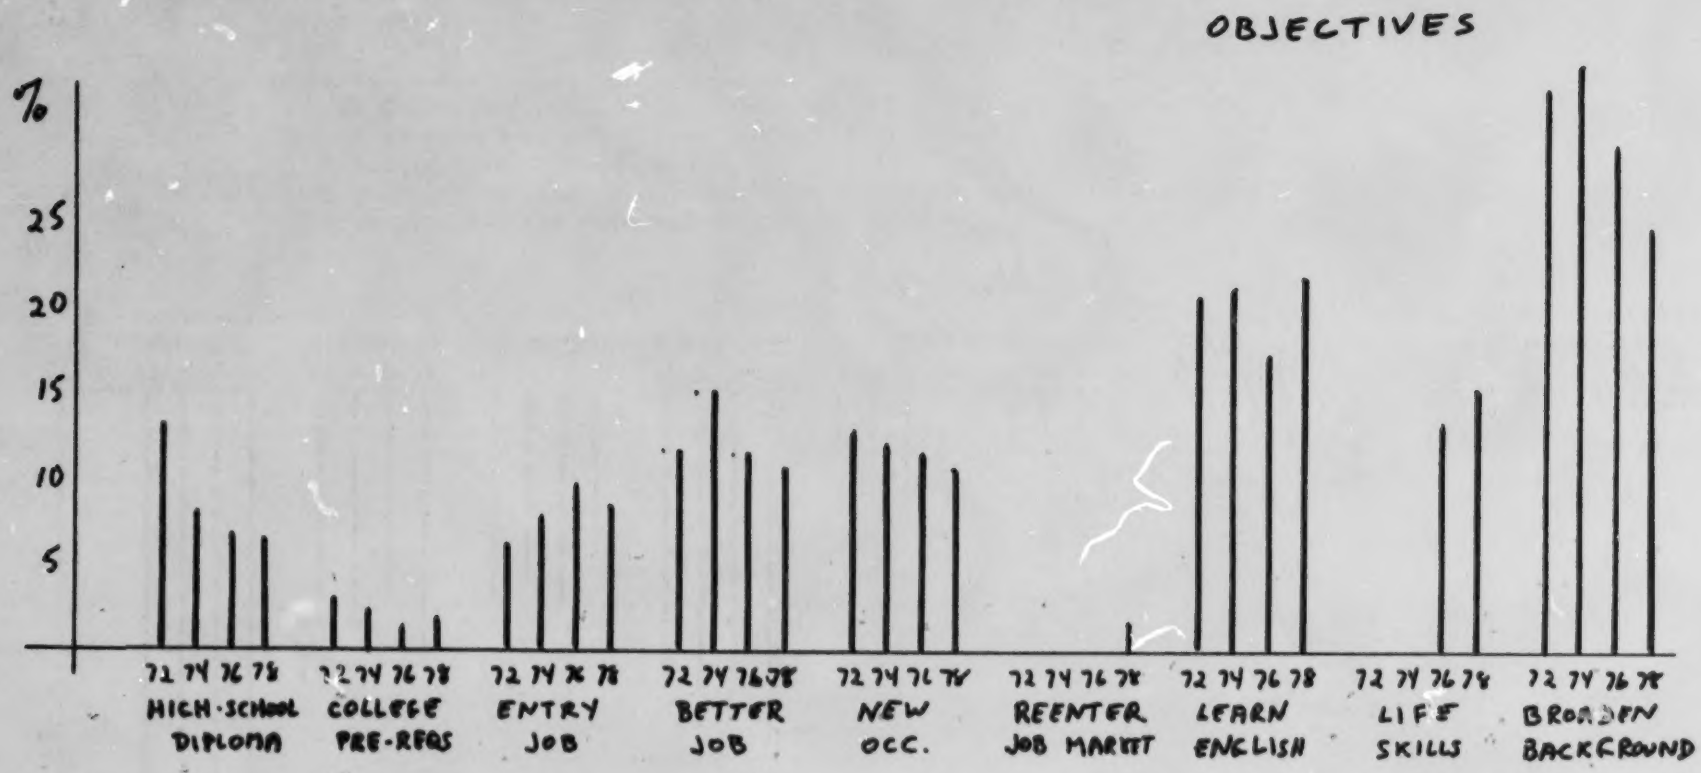


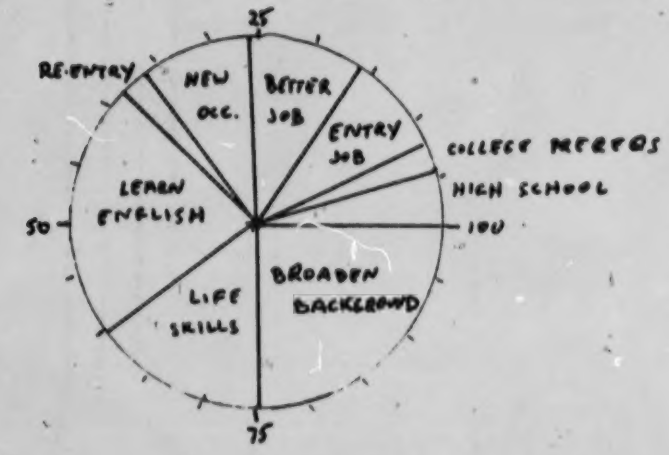
- Largest groups of students in the 25-34 year age bracket. However on a yearly basis, there are more younger students.
- Significant increase in the 25-34 year bracket over the eight year period, perhaps indicating the importance of career development training
- Increase of senior citizens over 65 occurred between 1974 and 1976, perhaps attributable to offering expanded programming to the older students. There was no growth, and also no decline in the last two years.

RACE - ETHNIC



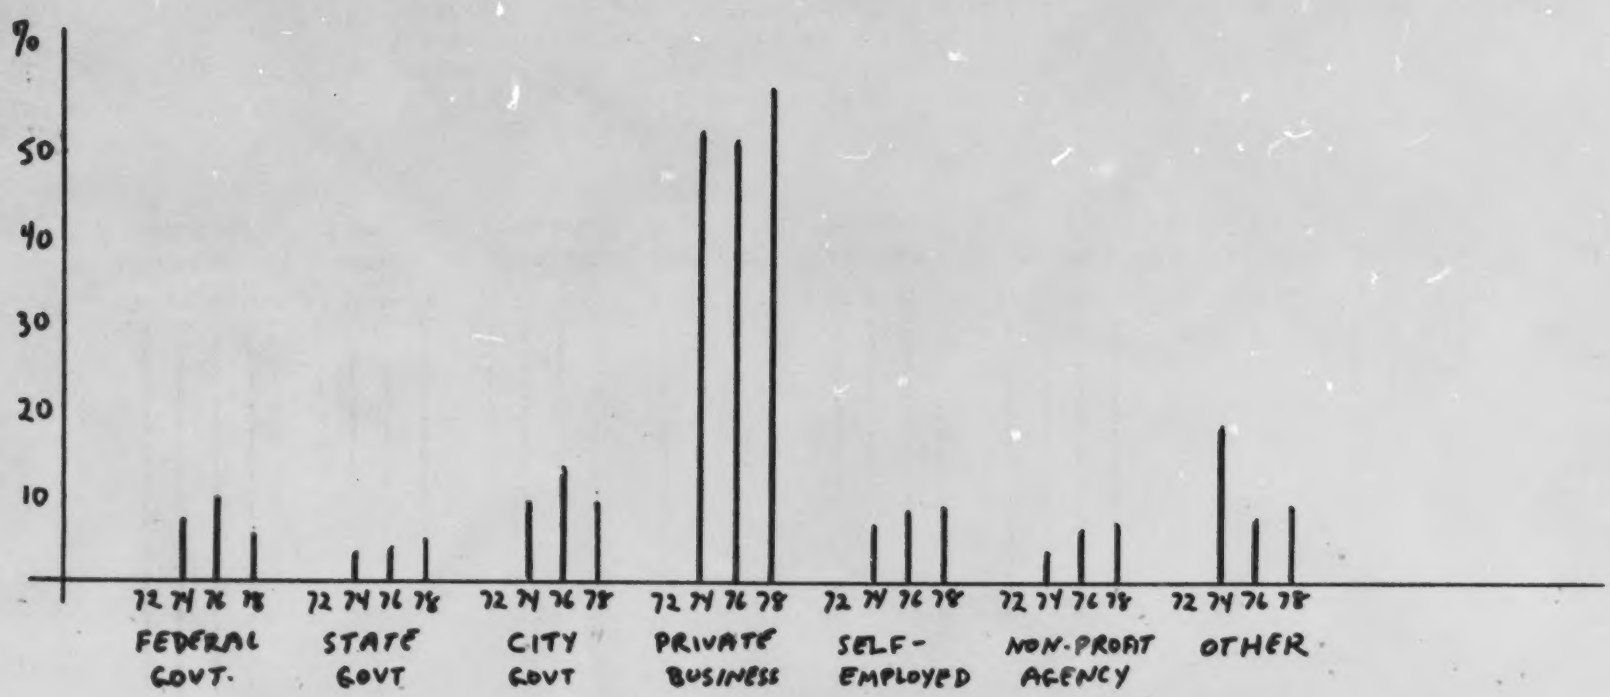
- 60% minority student population compares with estimated 56% City wide.
- Over 8 years, decline in proportion of white and black students with increase in Hispanic and Chinese.
- 50% of Chinese students attend classes at Chinatown North Beach Center.
- 50% of Hispanic students attend classes offered by Mission Community College Center.
- Blacks do not concentrate at any one Center; 28% are at John Adams and 20% at Galileo.
- 50% of white students attend Galileo.

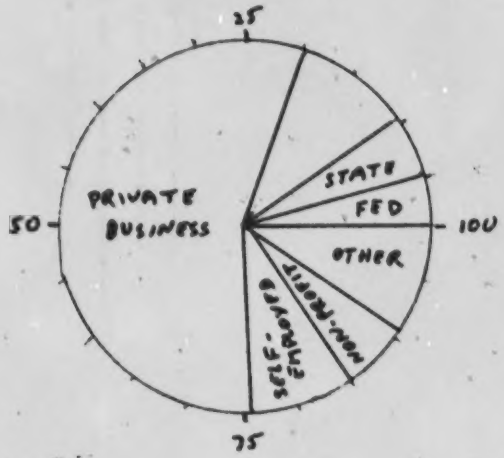




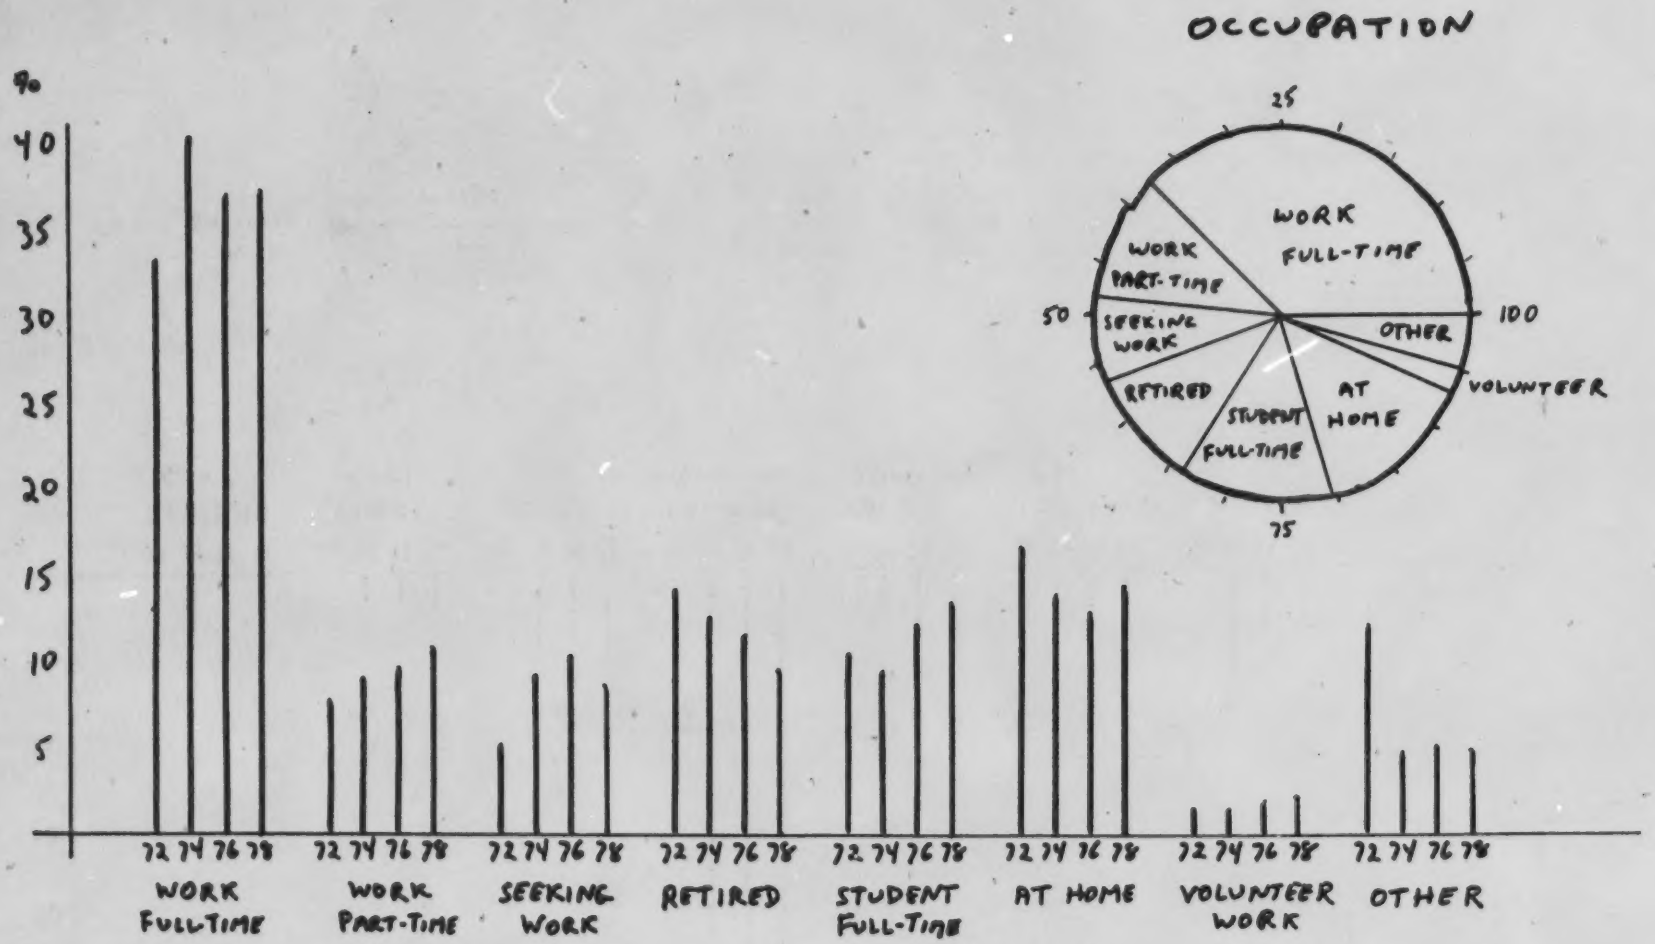
- About one third of students have job-related goals.
- About 30% have immediate academic goals which must be met before job related goals can be set.
- Only 25% acknowledge the general goal of "broaden background".
- Slight but consistent decrease in career advancement.
- Change in emphasis on high school diploma program apparent with the decline since 1972
- Significant decrease in proportion of those without immediate academic or occupational, a trend apparent even before Proposition 13 and program cut-backs.

Employed By





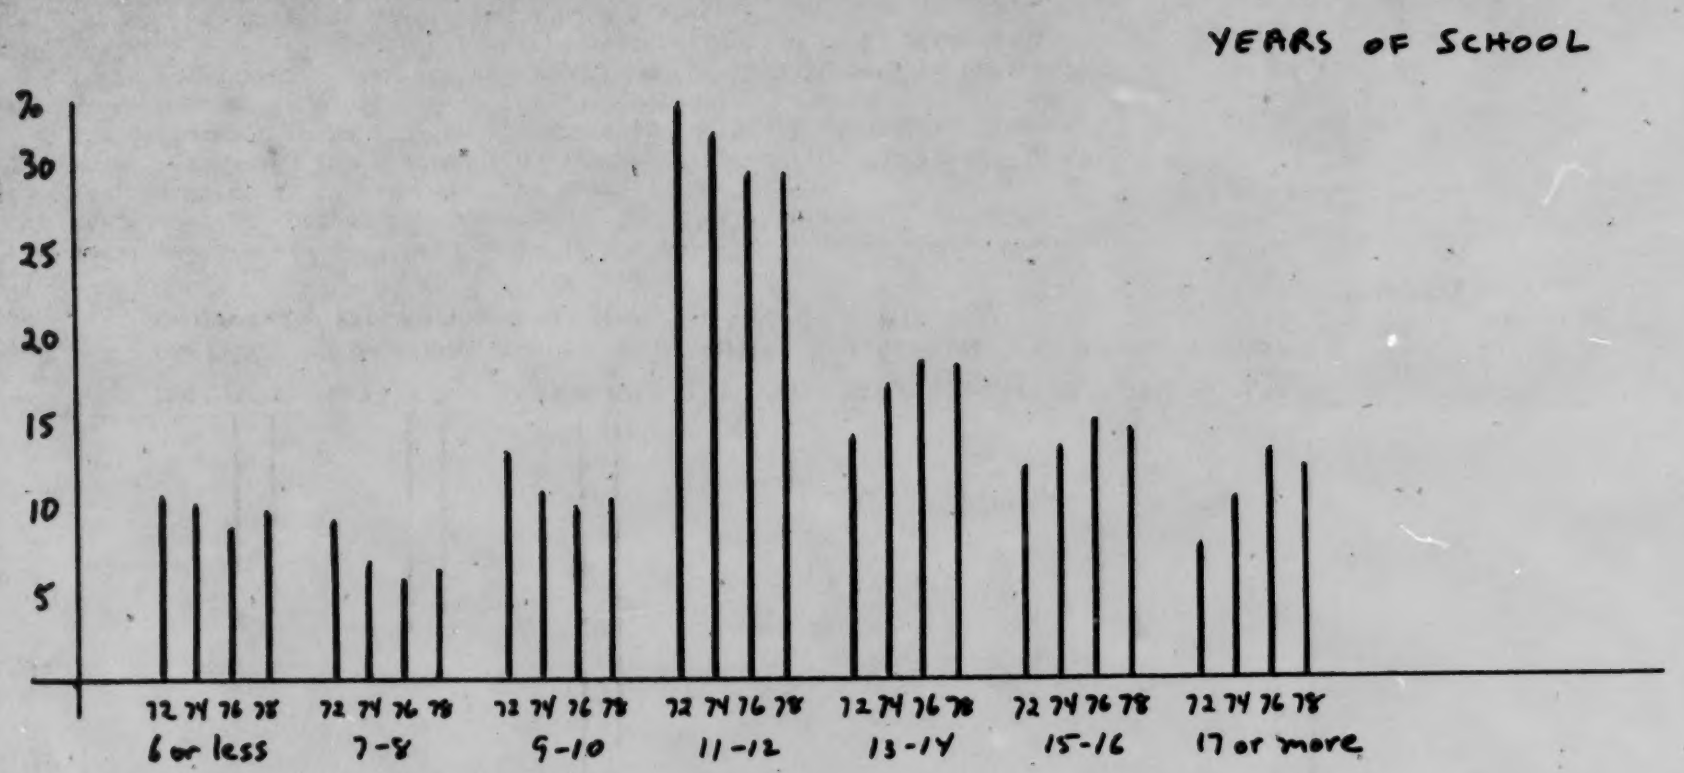
- More than half of the employed students work for private business with twenty percent in the public sector.
- In 1976 a larger proportion worked for the Federal Government and the City than did in 1978 but no trend is discernible.
- Self-employment, about 9%, has increased slightly since 1972 as has those working for non-profit agencies, now about 6%

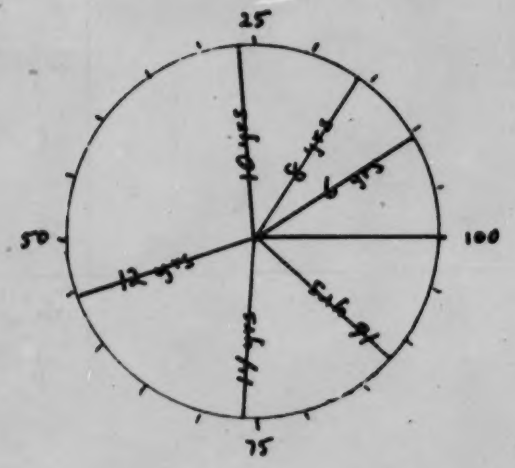


27

- More than 35% students work full time with another 10% working part-time
- In 1974 a greater proportion of students were working full-time than either 1976 or 1978
- Those working part-time showed a slight but continual increase.
- Although there was increase in older students, there was a definite decline in the proportion of students who considered themselves retired.

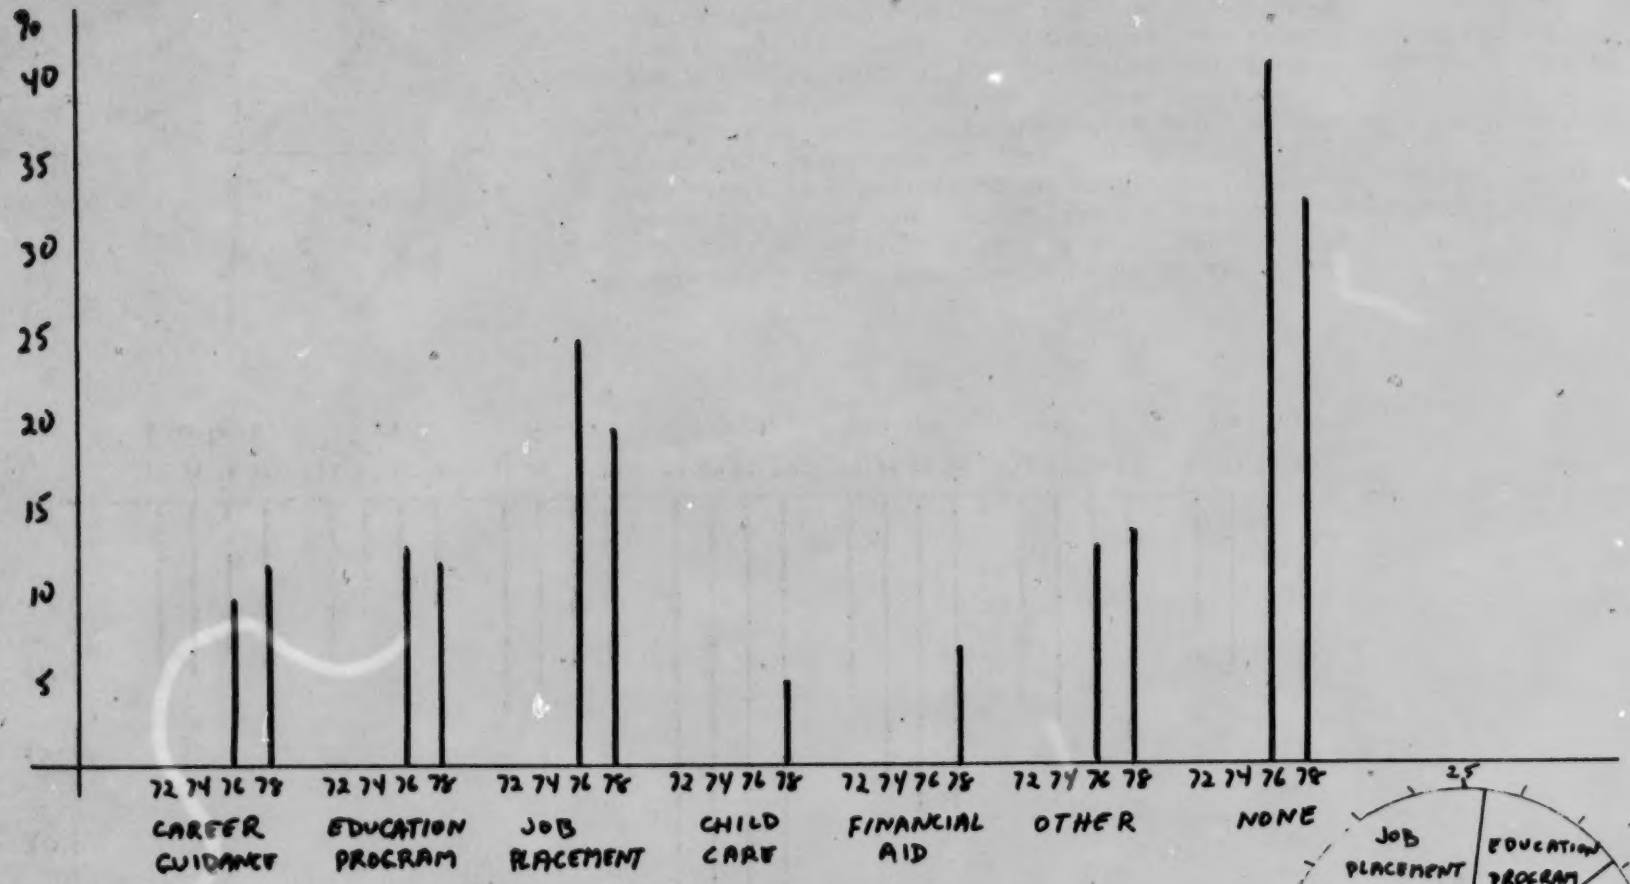
28

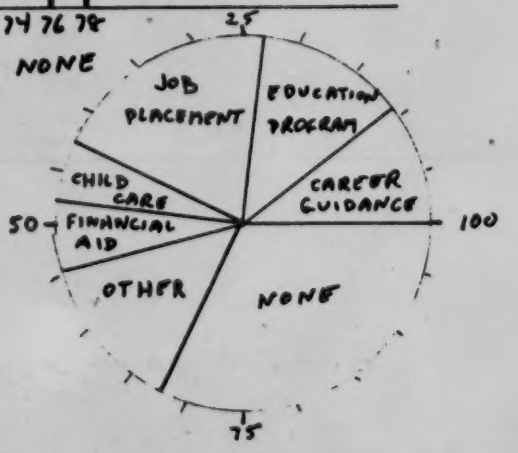




- There was little significant changes in the number of years of schooling already completed by our students between 1976 and 1978
- Since 1972 there was a consistant increase in the proportion of students who completed schooling beyond high-school with a uncomitant decline in those with less years of schooling.
- About 25% of current students had 10 years or less of schooling while another 25% had gone beyond 14 years of school,
- The number of years of schooling does not agree necessarily with diplomas or degrees earned; which question has varied somewhat since 1972 with inclusion of a response for foreign education.

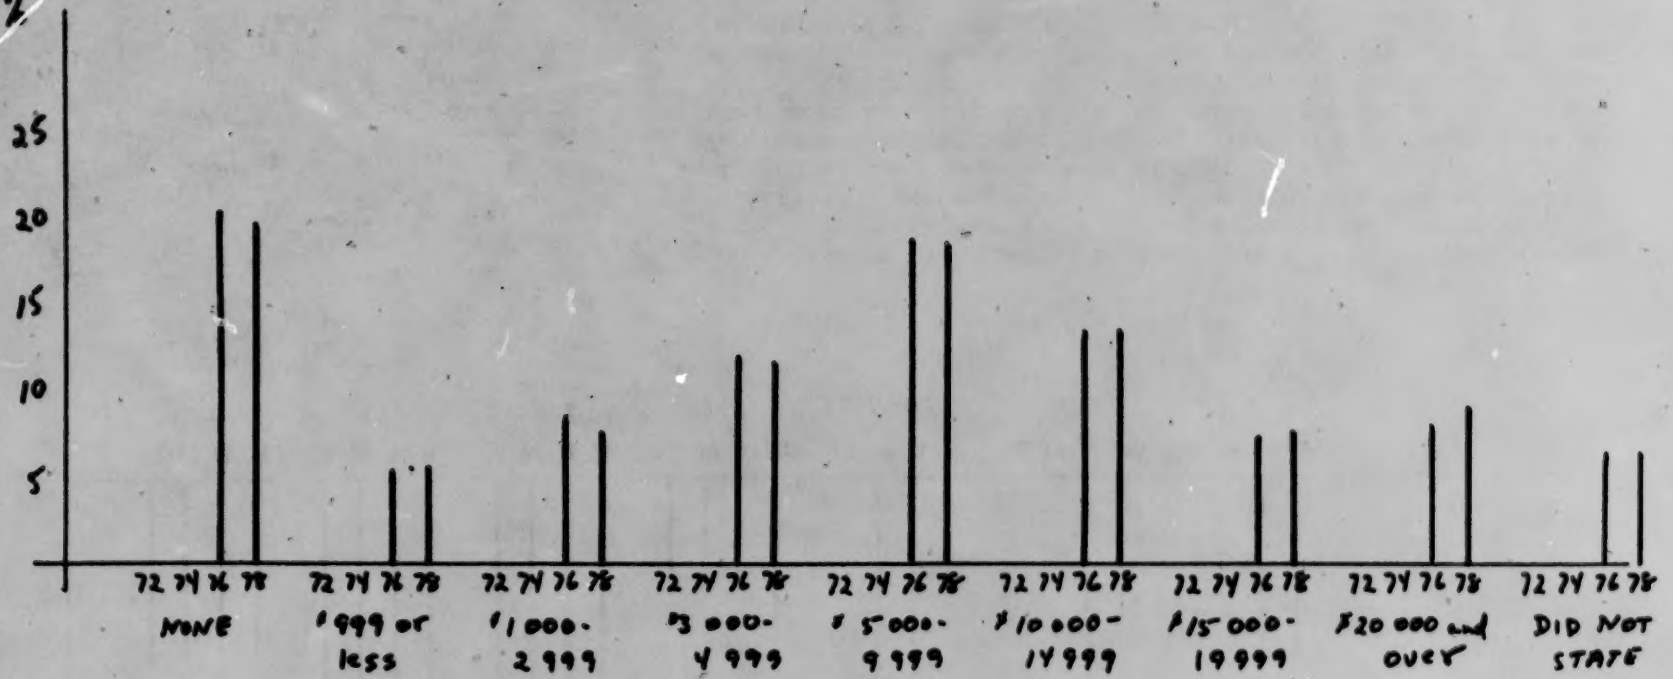
STUDENT SERVICE

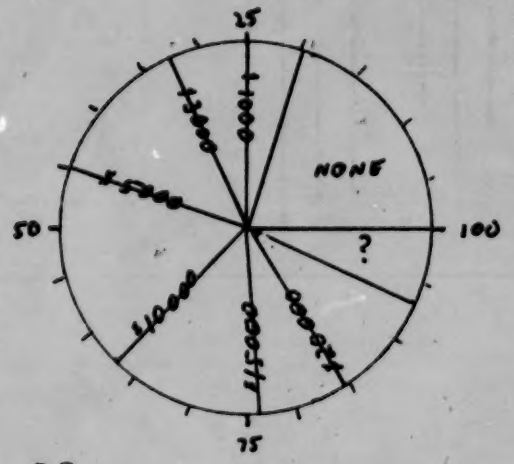




- This question has only been asked in the past two surveys and recognizing the different options for responses, they have been fairly conistent.
- Job placement is the most desired service.
- Those requesting job placement assistance dropped from 25% to 19% in 1978, the difference perhaps being attributable to the 7% requesting financial aid, an option not offered in the 1976 survey.
- Those requesting no service declined from 40% to 33%, perhaps because child care and financial aid were viable options in 1978, although an "other" category was available in both years.

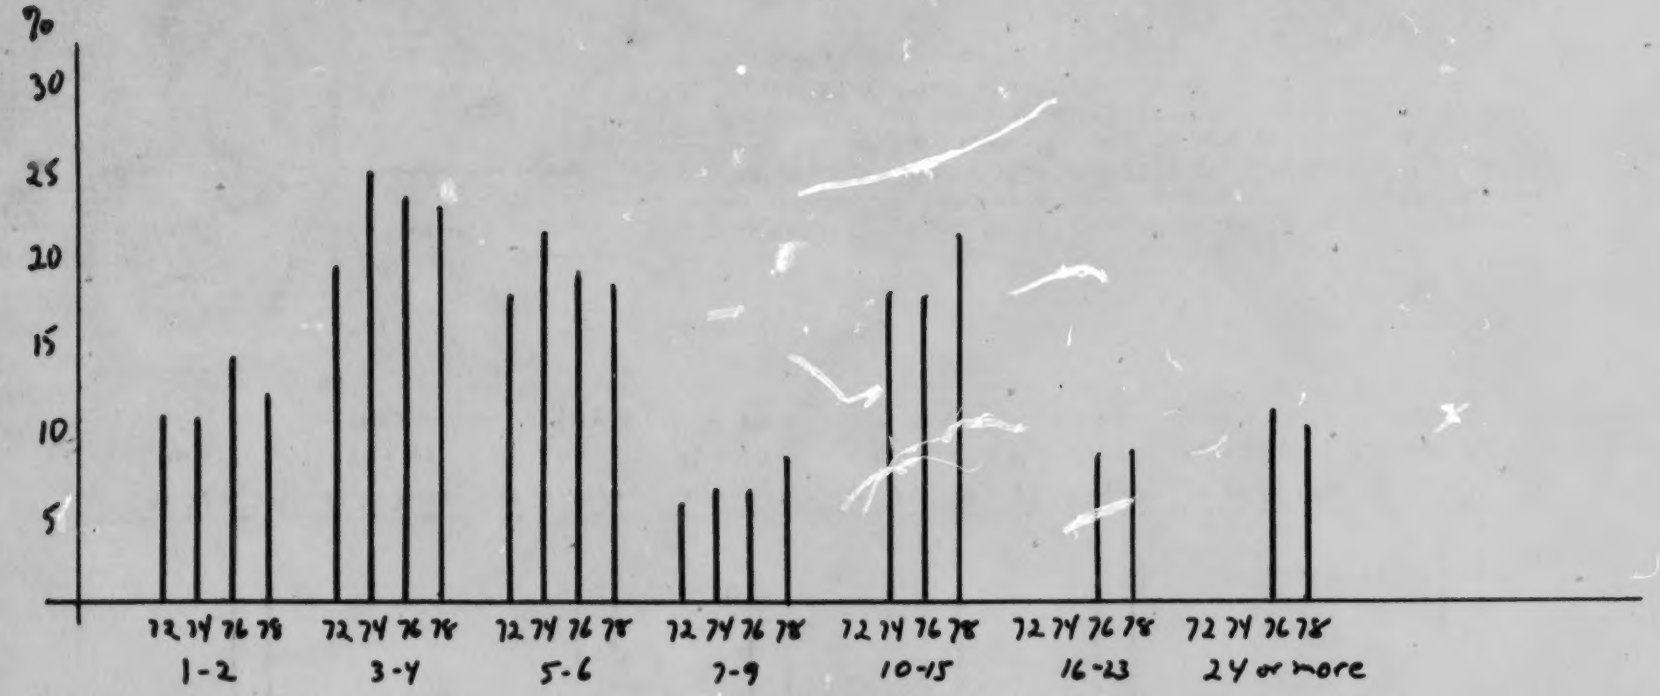
INCOME

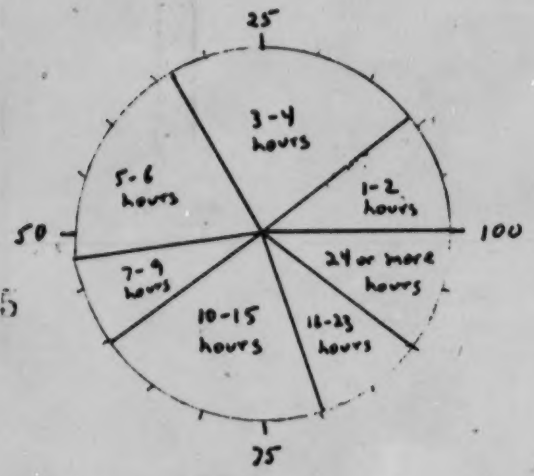




- Although the wording of this question is not precise as to definition of student's available income, the results are more consistent between 1976 and 1978 than for any other question.
- Only six percent thought question too personal to answer.
- Except for the twenty percent who reported no income, the income distribution is fairly normal with the mode at the $5,000-$9,999 range.

CLASS HOURS WEEKLY





- About half of the students attend class 6 or less hours a week, with almost half spending 7 or more hours in the classroom
- More than 20 percent take 10 - 15 hours of classes, probably most of them in one class two hours daily.
- Ten percent attend twenty-four or more hours of class; a large part of those are in the high school program.
- Although a consistent trend is not apparent, the data does suggest that students may be attending more hours of class weekly than in earlier years.

4. Comparison by Discipline of Instruction

Community College Centers

Student responses were summarized by the CID codes (Classification of Instructional Discipline) so that characteristics of students in different disciplines may be reviewed. 23 different CID codes were identified with only 5 having more than 5% of students. These 5 account for more than 2/3 of students. Nine disciplines account for 82.5% of all students.

CID	Discipline	%
48	English as Second Language	31.3
05	Business, Management	14.7
13	Consumer Education	8.6
10	Fine, Applied Arts	6.1
09	Engineering	5.5
15	Letters	4.7
22	Social Science	4.0
11	Foreign Languages	3.9
49	General Studies	3.7
	All Others	17.5
		100.0

Sex patterns vary among disciplines. Engineering students are predominantly male and those taking consumer education are predominantly female. Business and Management students are also largely women because of the preponderance of typing and clerical courses included in that CID category. One would have to look at individual class data to get a better measure of sex stereotyping.

	ESL	Bus.	Consumer Ed.	Arts	Engin.	Total
Male	41.8	23.8	20.0	36.5	89.7	39.7
Female	58.2	76.2	80.0	63.5	10.3	60.3
	100.0	100.0	100.0	100.0	100.0	100.0

These programs show different attractions for each age group. Engineering, business and ESL were most comparable which suggests that persons taking ESL are probably prevocational. Consumer education and Arts students are certainly older than students in other disciplines. Social Science and General Studies, each accounting for about 4% of the students, were the disciplines in which the classes for senior citizens were included. 48% and 73% of their respective students were 65 and older.

	ESL	Bus.	Consumer Ed.	Arts	Engin.	Total
24 and under	30.2	34.5	11.0	11.8	30.9	28.6
25 – 44	48.0	50.2	54.3	51.4	53.7	44.8
45 – 59	14.3	12.7	11.2	12.3	12.6	12.7
60 and older	7.5	2.7	23.5	24.5	2.8	13.8
	100.0	100.0	100.0	100.0	100.0	100.0

As would be expected in the San Francisco population and with current immigration patterns, almost all ESL students are ethnic/racial minorities. Minorities are also more involved in occupational disciplines including business and engineering and not in the more fundamental consumer education or arts programs.

	ESL	Bus.	Consumer Ed.	Arts	Engin.	Total
White	6.5	25.8	60.0	71.0	39.0	33.7
Black	.4	23.7	15.1	3.5	10.3	12.2
Hispanic	31.1	17.2	6.9	7.9	15.3	17.6
Chinese	39.7	13.5	9.1	8.4	16.2	20.7
Southeast Asian	11.5	2.3	.6	.5	1.8	4.4
Other Minorities	10.8	17.5	8.3	8.7	17.4	11.4
	100.0	100.0	100.0	100.0	100.0	100.0

About half of the students have income of less than $5,000. ESL students have very low incomes as might be expected with pre-occupational students. What was unexpected was the fact that one in three students in the consumer education program had an income of over $15,000. One in four engineering students also had incomes over $15,000 indicating perhaps the importance of career advancement education as well as for initial job placement. Of those in apprentice programs 30% had incomes over $15,000 with another 30% in the $10,000 – 15,000 category.

	ESL	Bus.	Consumer Ed.	Arts	Engin.	Total
less than $ 1,000	40.0	35.8	13.4	14.7	22.7	29.9
$ 1,000 – 4,999	22.8	19.5	18.2	19.7	13.2	20.9
$ 5,000 – 9,999	19.8	15.9	16.2	20.4	17.6	17.5
$10,000 – 14,999	7.0	12.6	14.4	16.6	18.0	11.4
$15,000 or more	5.5	12.4	32.2	19.9	25.7	13.8
did not state	4.9	3.8	5.6	8.6	2.8	6.5
	100.0	100.0	100.0	100.0	100.0	100.0

The income level relates somewhat to students' objectives. 27% of engineering students were taking classes to attain a better job, whereas a like proportion of business students were looking towards entry level jobs or to reenter job market. One in every two of the students in Consumer Education programs were there to learn life skills, a very high proportion in light of their high income level.

Category Codes

About 4% of the respondents were enrolled in classes for the handicapped, about half of whom are in the age range of 21 to 34, not too different from proportion of all students. A much smaller proportion of minority students are among the handicapped than might be expected based on the general population. Likewise a much larger proportion are native born citizens than in the general student population. Their primary goal is to learn life skills and their income level is considerably below other students.

	% of Students	% of 21 – 34	% of Minority	% of Native Born	% of Life Skills	Median Income
Handicap ABE	1.1	55.8	53.8	87.8	52.1	$2,500
Handicap Others	2.7	46.7	39.0	85.2	41.9	$3,300
Total Handicap	3.8	49.5	43.5	86.0	45.0	$3,000
All Students	100.0	45.4	66.3	46.1	13.2	$5,000

5. Comparison by Planning Area of Residence

Community College Centers

Based on ZIP codes of home addresses, planning areas comparable to City Planning areas were assigned. Those from outside the City were differentiated primarily among the neighboring counties. This year a fee was imposed on community service or defunded courses for those residing outside San Francisco, but it did not serve to significantly effect the proportion of students who reside outside the city as that proportion was dropping slightly over the last 4 years. Most of these commuters are white males, between ages of 20–35, better educated, and with higher income than San Francisco residents. This is in keeping with the fact that most of them are in occupational and apprenticeship courses, previously discussed as having higher than average income levels. As a matter of fact 30% of all apprentices come from San Mateo County and another 10% from Marin and the East Bay.

City	1978	1976	1974	1972
Marin	0.9	1.2	1.4	1.3
Contra Costa	0.1	0.1	0.2	0.3
Alameda	1.8	2.0	1.8	0.8
San Mateo	4.5	4.8	5.2	3.6
Santa Clara	0.2	0.2	0.2	0.1
Outside San Francisco	7.5	8.3	8.8	6.1

Students attend Centers classes from all parts of San Francisco, with large concentrations from Civic Center – Chinatown – North Beach area and from the Mission district. Comparisons were made with 1970 Census tracts, and the Planning areas based on ZIP codes areas are rough approximations of those areas. It is also expected that population characteristics have changed in San Francisco in the eight year period since the Census. Nevertheless, some general comments are valid and perhaps useful.

The areas mentioned above, Civic Center – Chinatown and North Beach and the Mission district account for an above average proportion of students largely Asian and Hispanic. Sunset – Parkside areas account for smaller proportions of students and they are areas with lowest proportion of minority students.

The areas of City with the highest concentration of black residents generate fewer students per 1000 population than do the areas of Chinese and Hispanic students but more than those in primarily white neighborhoods.

There are very marked differences to the student responses in different areas of the city. For example the primary objective of students residing in Chinatown and the Mission is to improve English with a secondary objective being career oriented. In Western Addition and Bayview areas occupational is prime motivation with high school diploma also strong in Bayview area. Six of ten students residing in the Marina area attend classes to broaden their background.

61% of those in the Bayview area are unemployed, a larger percent than of any other area, concomitant with the largest percentage, 17%, seeking work. There are also more full-time students than in other areas – those students in the high school program. That area is also unique in their request for student services; seven of every eight students from the Bayview area would like some student services, the most frequently mentioned being job placement compared to five of every eight students city-wide.

6. Comparison by Student Objectives

Community College Centers

Student Objectives

Students were asked to identify their major goal; a student who is learning English would probably list that as his major goal although he might respond with an entry level job as some understanding of English might be required to enter the job market. However, the responses are good indicators. There are apparent differences in the student characteristics dependent upon their goals.

Although there are more women students in the Centers than male students, two listed objectives are slightly more important to men. They include college prerequisites and seeking a better job. Re-entry programs are generally thought of as for women; yet 30% of those seeking to reenter the job market are men.

	% Distribution	Male	Female
1 High School Diploma	7.9	40.3	59.7
2 College Prereq.	2.1	51.5	48.5
3 Entry Job	9.9	37.8	62.2
4 Better Job	9.7	50.8	49.2
5 New Occupation	4.3	45.5	54.5
6 Determine Ability	5.7	38.9	61.1
7 Reentry	1.8	29.6	70.4
8 Learn English	24.7	39.7	60.3
9 Life Skills	13.2	39.3	60.4
0 Broaden Background	20.7	34.5	65.5
	100.0	39.8	60.2

Students in the high school program are youngest – median age of 20– although 8% are 45 and older. A like percentage of those completing college prerequisites are also over 45. Although most of the reentry students are 25–34, almost 1 in 4 are 45 and older. Senior citizens predominate the "broaden background" group although 1 in 8 are younger than 25 years.

	Median Age	Predominant Ethnic Groups					
1 High School Diploma	20	Black	40.0	Hispanic	19.2		
2 College Prereq.	24	Hispanic	28.4	Chinese	18.8	White	18.8
3 Entry Job	25	Hispanic	22.2	Chinese	21.6		
4 Better Job	29	White	33.3	Hispanic	16.7	Chinese	16.4
5 New Occupation	31	White	41.3	Hispanic	17.2		
6 Determine Ability	30	White	40.1	Black	18.2		
7 Reentry	34	White	38.2	Chinese	18.7		
8 Learn English	31	Chinese	37.3	Hispanic	30.7		
9 Life Skills	34	White	53.9	Chinese	13.2		
0 Broaden Background	42	White	64.5	Chinese	14.8		
	31	White	33.8	Chinese	20.4		

Table above shows primary and secondary ethnic groups in each objective grouping. The minority groups are more concerned with basic skills and entry level jobs whereas Whites have had more opportunities at the lower levels and are now seeking to advance or change their careers.

The amount of time spent in classes is a function of the students' objectives. The highest median hours per week is for the groups who are completing college prerequisites followed by those wanting to attain entry level job skills. Those seeking to reenter the job market also spend on the average 12 hours in school each week. Most of the students in those groups, those with high occupational goals, and those learning English or working towards a high school diploma, the pre-occupational goals, attend school five days a week. Those seeking a better job or skills for a new occupation do not have the incentive, nor perhaps the time, to attend school for so many hours. Those with the least hours of attendance are those who seek to learn life skills or broaden their background.

	Median hours/week	% Distribution of days in class 5 days	2 days	1 day
1 High School Diploma	10	60.6	25.1	4.2
2 College Prereq.	18	61.6	17.9	8.5
3 Entry Job	15	68.1	13.0	10.7
4 Better Job	6	30.6	30.6	25.7
5 New Occupation	8	37.1	29.1	20.2
6 Determine Ability	5	29.7	28.1	30.9
7 Reentry	12	61.6	11.8	14.1
8 Learn English	12	63.5	9.1	3.7
9 Life Skills	6	15.3	23.6	50.0
0 Broaden Background	4	10.1	30.5	55.2

This data emphasizes that not only does one need to consider the number of students but also their use of educational resources.

Some 13% of the students do not plan to take any further courses, half of whom had never taken a course before suggesting that they did not find the first few months of school to their liking. Only 7.5% of the ESL students do not expect to continue. A surprising 23% of those working towards a high school diploma do not expect to continue their education, as do 26% of the students reentering the job market. Those concerned with reentry may feel that they need just one skill but I would think that most of those adults motivated to earn a high school diploma would continue with their education. Perhaps they plan to enter City College or another institution.

	% who do not plan to continue
1 High School Diploma	23.0
2 College Prereq.	16.3
3 Entry Job	14.6
4 Better Job	12.4
5 New Occupation	14.5
6 Determine Ability	12.1
7 Reentry	26.1
8 Learn English	7.5
9 Life Skills	14.0
0 Broaden Background	10.5
	13.0

Most students want some form of student services. For those completing high school work, about 20% are interested in educational program planning. Job Placement is the most mentioned service desired particularly for those whose goals are either entry level or reentry-level jobs. The major exception are those interested in either life skills or broadening their backgrounds, and the service they are most interested in was not defined.

Those objectives groupings with large proportions of persons not employed now, namely high school, entry and reentry goals, have the largest proportion of those seeking work, or are full time students.

The highest median income is in that group seeking to broaden their background, primarily a general education. Nevertheless, a large percentage have very low incomes, so one can not make a judgmental call on ability-to-pay.

	Median Income
1 High School Diploma	$ 900
2 College Prereq.	$ 1,000
3 Entry Job	$ 2,500
4 Better Job	$ 7,500
5 New Occupation	$ 5,000
6 Determine Ability	$ 6,000
7 Reentry	$ 3,600
8 Learn English	$ 3,100
9 Life Skills	$ 7,500
0 Broaden Background	$10,000
Total	$ 5,000

Those interested in life skills have the next highest income level. It is not suprising that those seeking a better job have a median income of $7,500, about twice as high as for the reentry group. Those reentering the job market may be more likely to have an employed spouse than one seeking an entry level job which might explain their higher income level.

It is of interest to note that student's objectives do not necessarily agree with what one might expect from course objective and thus student objectives must be considered as rough generalization. For example, 54% of those listing their goal as college prereqs. are in ABE programs and 16% in occupational courses. On the other hand, of those who wish to broaden their background, 16% are in occupational programs. Although most apprentices (42%) are seeking a better job, 9% are broadening their background with more than 16% seeking to learn life skills and a like number preparing for entry level jobs.

Not all students with clearly occupational goals are in classes which qualify for state funding. Thirteen percent of those seeking a new occupation are enrolled in community service or defunded classes; and 10% of those reentering the job market. These figures emphasize the difficulty in classifying the benefits of educational programs by the classification of course titles.

7. Comparison by Funding Source

Community College Centers

This year the state has considered some non-credited courses as not eligible for state support and these courses have now been called defunded or community service courses. They include some general education courses which would qualify for state support if they were offered as credit courses as well as courses of special interest to senior citizens and new or potential parents. Most of these courses are at Galileo and John Adams, and account for 24% of all students but only 10% of the student contact hours. One third of those in defunded classes attend 3 or 4 hours of class a week, compared to a like proportion of those in state supported programs who attend 18 or more hours weekly.

	Students	Average Contact Hours per student	Distribution of Contact Hours
1 State Support	73.5	14.2	85.6
2 Defunded	23.7	5.3	10.3
3 CETA	0.7	17.1	1.0
4 Other Contract	2.1	18.2	3.1
	100.0		100.0

The weighting of class hours per student should be kept in mind in analysis of differing characteristics of students in the different funding categories. CETA and other contract students are a very small portion of total.

Because of the Senior Citizen programs, the defunded or community service classes are heavily weighted by female students and older students. The proportion in the mid career ages of 25 to 54 are about the same in both groups of programs.

	State Funded	Community Service	All
Male	43.9	26.3	39.7
Female	56.1	73.7	60.3
20 & under	18.0	2.0	14.2
21 – 24	17.1	5.9	14.4
25 – 34	31.1	30.7	31.0
35 – 44	14.2	12.3	13.8
45 – 54	9.0	7.8	8.8
55 and older	10.6	41.3	17.8
	100.0	100.0	100.0

There is a very different ethnic composition of the funded and defunded programs. Minority students account for about 78% of the students in the funded programs and 28% in the defunded, and 66% in all programs. As the average contact hours per student is greater in the funded courses, appropriate weighting increases the percentage of minority students from 66% of number of students to 73% of student contact hours.

	State Funded	Community Service	All Programs
Black	14.1	6.3	12.2
White	21.6	72.3	33.7
Hispanic	22.1	4.8	17.6
Chinese	24.8	8.9	20.7
All Others	17.4	7.7	15.8
	100.0	100.0	100.0

As many ethnic minorities, particularly Asians are foreign born, there is large difference in citizenship status between the two groups with those with permanent resident status being the largest component of state supported programs and native born citizens in the defunded programs.

	State Funded	Community Service	Total
Native Born Citizen	36.9	76.0	46.1
Naturalized Citizen	10.0	13.8	10.8
Permanent Resident	42.7	8.1	33.8
Other Visas	10.4	2.1	9.3
	100.0	100.0	100.0

These sets of figures emphasize the large impact of immigration on educational needs of San Francisco. As more of our citizens learn English and job skills necessary for obtaining jobs, then they might take more of the so called general education courses.

These differences are clearly reflected in prior education with 28% of state supported group having had a foreign education and another 25% not having completed an elementary school program. Among those taking community service courses 45% have attained at least the AA degree compared to 10% in the first group.

	State Funded	Community Service	Total
Foreign Education	28.6	8.2	24.0
Elementary thru Occup. Cert.	35.5	40.1	36.4
AA thru Post Graduate	10.5	46.0	18.8
None	25.4	5.7	20.8
	100.0	100.0	100.0

Students' goals conform to what might be expected in both groups of programs. In the defunded group 56% want to broaden their background as contrasted to 9% in the first group. The median hours per week of class in the first group is 10 contrasted to 4 hours in the defunded programs.

About 40% of each group is working full or part time. The difference is the two groups in occupation is that 23% of those in state supported programs are full time students whereas a similar proportion are retired in the defunded group.

The income levels of the two groups are also very dissimilar. 30% of those in state-supported classes have no income compared with 7% of those taking community service courses. 10% of the first group reported incomes over $15,000 compared to more than 25% of the community service group. The median income of those in state supported classes is about $4,000 and $11,000 for the second group.

8. Comparison by Ethnic Composition

Community College Centers

The characteristics of students within each ethnic group are quite different. Most ethnic groups are near the average 40–60 ratio of men to women students. Alaskan Natives, although a very small segment, is 83% male; three of four Japanese students are female and Southeast Asians, mostly recent arrivals, are about equally divided between men and women.

	% Male	Median Age	% over 55
1 Alaskan Native	83.3	27	20.0
2 American Indian	54.0	29	8.0
3 Black	38.0	27	14.3
4 White	39.5	34	29.7
5 Hispanic	42.9	28	7.4
6 Chinese	41.9	34	16.8
7 Filipino	44.2	31	13.6
8 Japanese	27.1	32	14.2
9 Southeast Asian	50.4	32	10.7
	41.0	32	19.7

25% of Black students, 24% of Filipino and 20% of Hispanic students are 20 or younger, compared to 7% of white students and only 4% of Japanese.

The median age of White and Chinese people is highest at about 34 years old, and Blacks are lowest at 27 years. A much smaller proportion of Hispanic older persons attend than for any other ethnic or racial group. We might wonder if we are not meeting their needs.

About two of every three Hispanic and Chinese students are here on permanent resident visas, and 30% and 25% respectively now are citizens. About one of two Filipino and Japanese students are citizens. Some 60% of the Southeast Asians are on refugee visas.

A much larger proportion of ethnic minorities than white students have had no formal education. About one in three Hispanic students had no formal education, another one in three had some foreign education and a similar proportion had at least a high school education. A large proportion of Asian students have had some foreign education but the S.I.Q. did not acertain the level of that foreign education.

	Foreign Ed.	Elementary	High School or Cert.	College	None	Total
Black	1.2	15.0	54.3	13.0	16.6	100.0
White	7.0	6.1	40.4	40.1	6.4	100.0
Hispanic	30.6	5.1	22.1	7.0	35.2	100.0
Chinese	50.0	4.4	13.4	11.6	20.6	100.0
Filipino	26.8	6.9	26.1	13.4	26.9	100.0
	22.3	6.4	31.0	22.7	17.6	100.0

Most White students are taking 3 or 4 hours of class each week with only 74% taking 12 or more hours. 14% of Black students are taking 24 or more class hours weekly about comparable to the Hispanics, Filipinos and Southeast Asians. Most Chinese attend 10 hours a week. Thus a varied pattern is evidenced.

	1 – 6 Hours	7 – 11 Hours	12 or more
Black	52.8	15.3	31.9
White	74.2	11.6	14.2
Hispanic	30.3	33.7	36.0
Chinese	28.7	40.4	30.9

There is wide variation in modes of travel to class. Almost half of the White and Japanese students use private cars; almost half of the Blacks and Hispanics use the Muni system. More than 1 of 3 Chinese students walk to classes as do 1 in 5 Hispanics.

	Car or Pool	Muni	Walk	Other	Total
Black	32.1	47.1	14.9	5.9	100.0
White	47.9	28.5	18.8	4.8	100.0
Hispanic	27.7	48.5	20.6	3.2	100.0
Chinese	19.0	42.4	36.3	2.3	100.0
Japanese	44.2	33.8	18.2	3.8	100.0
	35.0	39.9	21.7	3.4	100.0

Only 13% of the students do not expect to continue classes next year. Among the Blacks, it is 18%. As has already been noted, those taking high school programs, do not expect to continue. Among the Hispanic and Chinese, the rate of expected non-continuing is half as large.

	Plan Not to Continue	Had Attended in Prior Years
Black	18.2	59.9
White	14.4	66.0
Hispanic	9.3	54.3
Chinese	8.0	72.0
Filipino	16.9	60.0
Total	13.2	63.7

These expected continuation rates do not seem to correlate with prior attendance at Centers classes. Chinese students have the highest rate of past participation and lowest drop-out plans, whereas Hispanics have lowest rate of past participation and also low drop-out expectation. This might indicate that Hispanics as a group only recently availed themselves of educational opportunities and now find them worthwhile.

There is an apparent relationship between student's objective and expectation of further education which might explain the ethnic difference indicated above. Where a high school diploma is the student's objective, it indicates a definite program. For large numbers of students it will be completed in the current year and these students apparently have not considered education beyond that point. Those learning English see it as part of a larger process.

Direct occupational purposes were predominant for all groups but specially Blacks and Filipinos. Hispanic and Chinese students are primarily interested in learning English. White students most often attended classes to broaden their background, the most frequent objective of the large number of senior citizens.

	High School	Learn English	Occupational	Broaden Background	Other
Black	22.9	2.5	40.6	15.7	18.3
White	2.3	4.7	28.3	41.7	23.0
Hispanic	8.4	12.2	60.2	8.5	11.7
Chinese	2.1	44.1	26.4	16.5	10.9
Filipino	15.0	10.2	47.7	13.6	13.5
Total	6.2	21.7	30.7	24.6	16.7

As stated above 13% do not expect to continue their education which leaves 87% who do; about one in four students would like assistance in career guidance and educational programs planning.

	Black	White	Hispanic	Chinese	All
1 Career Guidance	14.9	9.6	10.9	12.8	11.5
2 Ed. Program Planning	13.1	7.6	15.6	13.5	11.8
3 Job Placement	26.0	10.8	27.1	21.7	19.4
4 Child Care	4.6	5.8	4.7	3.7	4.9
5 Financial Aid	12.9	4.7	9.5	4.8	6.5
6 Other	7.8	16.1	14.4	11.7	13.4
7 None	20.6	45.4	17.9	31.9	32.5
	100.0	100.0	100.0	100.0	100.0

Job placement is a highly desired service requested by about one in four minorities and only one in ten white students. Actually, more students requested that service than those who were now seeking work, indicating high interest in job changes in addition to placement for those not now working. The Black student population includes the largest group requesting placement assistance and seeking work.

	Requesting Job Placement Assistance	Seeking Work
Black	26.0	16.1
White	10.8	5.2
Hispanic	27.1	8.0
Chinese	21.7	11.0
Total	19.4	8.5

Present occupation reflects both cultural and economic patterns. Because of past employment and cultural practices, "retired" persons are more likely to be male and those "at home" female. White students include some 28% in those two categories, whereas Filipino students include the smallest proportion of both "retired" and "at home" persons than any other ethnic group. The Chinese and Hispanic students include a significant proportion who are at home but only small percent of retired persons. This is of interest in light of the high median age of Chinese. Japanese include a very small proportion of retired persons but 30% are "at home".

Present Occupation	Black	White	Hispanic	Chinese	Filipino	Japanese
Work Full Time	28.6	40.1	36.1	39.7	47.5	28.3
Work Part Time	10.2	10.0	9.8	14.5	9.1	11.8
Seeking Work	16.1	5.2	8.0	11.0	11.1	3.4
Retired	8.3	16.1	2.6	5.8	2.3	6.4
Full Time Student	21.0	6.1	21.9	9.7	18.4	7.8
At Home	9.5	13.1	16.4	15.5	8.9	30.5
Volunteer	1.1	3.3	1.4	1.1	.5	2.2
Other	5.1	6.1	3.7	2.7	2.1	9.5
	100.0	100.0	100.0	100.0	100.0	100.0

Some 40% of the Black students now working, work for an agency of the government, compared to 20% of working Whites, 11% of Hispanics and Chinese. This is very significant in light of the large proportion of Black students seeking employment.

There are large income variations among the ethnic groups which can be related to age and educational background which influence to a large extent the level of employment. Almost 1 in 10 White students would not disclose their income level whereas only a very small segment of Chinese did not. Although about 10% of minority students have a household income of more than $15,000 more than 50% have less than $5,000. This is about twice the proportion of white students below the poverty level income for a family of 4.

	Median Income	Below $5,000	$ 5,000 – 10,000	$10,000 – 15,000	$15,000 and over	Did Not State
Black	$3,200	60.5	13.9	8.8	10.4	6.4
White	$5,800	29.0	18.1	17.2	26.7	9.0
Hispanic	$3,700	57.6	17.6	10.5	8.8	5.5
Chinese	$4,800	51.5	24.1	12.1	9.6	2.7

Only 25% of Black students attend evening classes compared to about 40% of white students and other minorities. A large proportion of black students are in the high school program which is primarily morning classes at John Adams but that would not seem to explain the large difference among day and night classes by ethnic groups.

APPENDIX

A. Forms and Codes

1. S.I.Q. Questionnaire
2. Instructor Class Identification Form
3. Planning Area Map
4. Coding Sheet
5. Instructions for Editors-Coders

B. Computer Summary Runs – All Centers

1. By Each Center
2. By CID Codes (classification of instructional disciplines)
3. By Category Codes (specified groupings of classes)
4. By Planning Area (student residence)
5. By Age
6. By Student Objectives (reason for taking classes)
7. Funding (recognition of State "defunded" programs)

San Francisco Community College District Community College Centers

STUDENT INFORMATION QUESTIONNAIRE

FALL, 1978

The Community College Center I am now attending is ..... _____

1. Alemany 3. John Adams 5. Pacific Heights 7. Chinatown/North Beach
2. Galileo 4. Mission 6. John O'Connell 8. Skills Center
9. Downtown Center

The information compiled from this survey will be used for planning purposes to enable us to meet the educational needs of the adults in the community. Therefore, you will receive this questionnaire in each class that you are attending. Even though you may be asked to complete it more than once, please help us by answering all questions in each class that you attend, and return the completed for to your teacher.

FOR EACH QUESTION, CIRCLE THE NUMBER OF ONLY ONE ANSWER THAT BEST DESCRIBES YOU, AND WRITE THAT NUMBER IN THE CORRENT SPACE IN THE RIGHT COLUMN. BUT, FIRST, WRITE YOUR HOME ZIP CODE IN THE SPACE BELOW.

ZIP CODE of home address is _ _ _ _ _

A. SEX A. _____

1. Male 2. Female

B. AGE B. _____

1. Under 18
2. 18 -19
3. 20
4. 21 - 24
5. 25 - 34
6. 35 - 44
7. 45 - 54
8. 55 - 59
9. 60 - 64
10. 65 or older

C. RACE OR ETHNIC BACKGROUND C. _____

1. Alaskan native
2. American Indian
3. Black (not Hispanic)
4. White (not Hispanic)
5. Hispanic
6. Chinese
7. Filipino
8. Japanese
9. Southeast Asian
10. Other Asian/Pacific Islander

D. CITIZENSHIP STATUS D. _____

1. U. S. citizen-native born
2. U. S. citizen-naturalized
3. permanent resident (green card)
4. visitor visa
5. student visa
6. refugee-parolee visa
7. other visa

E. I AM A U.S. MILITARY VETERAN E. _____

1. prior to World War II
2. World War II
3. between World War II & Korea
4. Korean Conflict
5. between Korea & Vietnam
6. Vietnam Era
7. Post Vietnam Era
8. Served in Non-U.S. military
9. No military service

F. NUMBER OF YEARS OF SCHOOL I HAVE COMPLETED. . . . . F. _____

1. 6 or less
2. 7 or 8
3. 9 or 10
4. 11 or 12
5. 13 or 14
6. 15 or 16
7. 17 or more

G. THE HIGHEST DIPLOMA, CERTIFICATE, OR DEGREE I HAVE RECEIVED IN THE UNITED STATES IS . . . . . G. _____

1. education not in U. S.
2. elementary school
3. high school
4. G. E. D. or Certificate of Proficiency
5. occupational certificate
6. junior college (AA or AS)
7. college or university
8. post-graduate
9. none

H. THE NUMBER OF HOURS PER WEEK I ATTEND COMMUNITY COLLEGE CENTERS CLASSES IS . . . . . H. _____

1. 1 - 2
2. 3 - 4
3. 5 - 6
4. 7 - 9
5. 10 - 11
6. 12 - 15
7. 16 - 17
8. 18 - 23
9. 24 - 30
0. 31 or more

I. I USUALLY GET TO CLASS MAINLY BY . . . . . I. _____

1. car
2. car pool
3. bus/streetcar
4. BART
5. bicycle
6. walking
7. motorcycle
8. other

J. THE LAST TIME I TOOK A CLASS OFFERED BY THE COMMUNITY COLLEGE DISTRICT WAS . . . . . J. _____

1. Summer 1978
2. Spring 1978
3. Fall 1977
4. two or more years ago
5. never

K. MY MAIN REASON FOR TAKING THIS COURSE IS TO . . . . . K. _____

1. work for my high-school diploma
2. complete my college prerequisites
3. prepare for entry-level job
4. get a better job in my present occupational field
5. change to a new occupation
6. determine my ability and interest in a new occupation
7. reenter job market
8. learn or improve my English
9. learn specific life skills
0. broaden my background

L. THE KIND OF STUDENT SERVICE THAT WOULD BE MOST USEFUL TO ME IS. . L. _____

1. career guidance
2. educational program planning
3. job placement
4. child care
5. student financial aid
6. other
7. none

M. MY PRINCIPAL OCCUPATION NOW IS . . . . . M. _____

1. employed full-time
2. employed part-time
3. seeking work
4. retired
5. full-time student
6. at home
7. volunteer work
8. other

N. I WORK FOR . . . . . N. _____

1. Federal government
2. State government
3. City government
4. private business
5. self-employed
6. non-profit agency
7. other
8. not employed now

O. I RECEIVED MY TRAINING FOR MY PRESENT EMPLOYMENT THROUGH . . . . . O. _____

1. high school
2. City College of S. F.
3. college - other
4. Community College Centers
5. other adult school
6. military
7. prior work experience
8. on the job
9. other
0. not employed now

P. I FOUND MY PRESENT JOB THROUGH . . . . . P. _____

1. school - instructor
2. school - counselor; placement
3. friends or relatives
4. private employment agency
5. public employment agency
6. going direct to employer
7. newspaper
8. union
9. other
0. not employed now

Q. MY APPROXIMATE TOTAL ANNUAL INCOME IS (IF MARRIED, INCLUDE INCOME OF PARTNER . . . . . Q. _____

1. no present income
2. $999 or less
3. $1,000-$2,999
4. $3,000-$4,999
5. $5,000-$9,999
6. $10,000-$14,999
7. $15,000-$19,999
8. $20,000-$29,999
9. $30,000 or more

R. I HAVE ALREADY COMPLETED THIS QUESTIONNAIRE IN ANOTHER CLASS THIS WEEK. . . . . R. _____

1. Yes
2. No

JJ. I PLAN TO TAKE A COURSE NEW YEAR . . . . . JJ. _____

1. yes or probably yes
2. no or probably no

San Francisco Community College District-Community College Centers

INSTRUCTOR-CLASS IDENTIFICATION FORM FOR STUDENT INFORMATION QUESTIONNAIRE

Fall 1978

.For Keypunch Use Only

CENTER LOCATION OF CLASS _____

CLASS NUMBER _____

SITE TYPE _____

Line 40 Name
(col. 40-54) First 15 characters and spaces of Instructor's Name, Last Name First

Line 55 Number
(col. 55-60) If only 5 digit number, insert initial 0 to make six digit number starting with 0.

Line 61 Special Codes
(col. 61-63)

Teacher Type	Funding Source	Special
1 Sched I	1 State - ADA	1 Substitute Teacher
2 Sched II	2 Community Service	2 Shared Teacher
3 Hourly	3 CETA	3 Problem
	4 Other Contract	0 No Problem

Line 64, 67, 69, 72 Numbers
(col. 64-75) Right justify; that is, insert leading 0 if needed to make a 3 digit number.

Special Coding for Question J and JJ

Will take a course next year (1 in JJ) then no change in J
Will not take a course next year (2 in JJ) and add 5 to J; change 10 to 0

INSTRUCTIONS FOR EDITORS-CODERS
for the 1978 Student Information Questionnaire

1. Use black felt-tip point on all forms. Write very clearly. Keypunch operations must be able to read your writing quickly and accurately.

2. For each class batch there should be a number of yellow SIQ forms together with one blue Instructor-Class Identification Form. If they are not already stapled together, staple each group in the upper left-hand corner.

3. The forms should be received in this office in groups by Community College Center. Keep them in groups by Centers; that is, work on batches of one Center at a time.

4. If the Batch Controller has not already done so, log in each batch on the control sheet for the appropriate Center and write the 3-digit batch number from the control sheet onto ~~the upper right hand corner of~~ the Instructor Class Identification form. ~~Locate the class in the class listings (Form A stubs) and write its batch number next to the class title. Then put a check mark next to the batch number on the control sheet.~~

Instructor-Class Identification Form

5. Check for completion of information on the Instructor Class Identification form. If the information requested on the ~~bottom~~ left-hand side of the form is not completed in every respect put that batch aside to question the supervisor. It must be complete to code completely.

6. Code the information requested and write your numbers clearly in the section marked "for keypunch use only" using a black felt-tip pen. Use your code sheet; do not rely on your memory.

   Line 6: name of the Center is coded into a one digit code. The second digit indicates the code for the type of site or facility. If the class is in the Center's own Administrative building code 1; if in another Center's Administrative building code 2. Otherwise use ownership codes as on coding sheet.
   Line 8: record the three digit batch number from the upper right-hand corner
   Line 11: record the four digit CID code EXCEPT if the code is for 49--. In that case see coding list.
   Line 15: write the two digit course category code.
   Line 17: indicate the two single digit codes to represent the days of the week and the time of the day the class meets.

7. Copy first 15 characters of name clearly on line 40 unless it has already been done. Note that a space is counted as a character. Check to be sure that there are not more than 15 characters on line 40.

8. Copy employee number on line 55. Insert initial 0 if necessary to make a 6 digit number.

9. On line 61 code the first digit schedule I as 1, schedule II as 2 and Hourly as 3. Code the next digit for funding source. The last digit is 0 unless indicated with additional instructors name. Then code as indicated.

Instructions for Editors Coders (cont)

10. Count the number of S.I.Q. forms attached to this Instructor-Class Identification form. If your count agrees with the number already recorded, then place a check mark next to the number written; if different check your count and circle the instructor's count. Write correct count on keypunch line 64, putting in leading 0 to make it three digit number if necessary, eq. 27 forms would be coded 027.

11. Copy hours per week to line 67. It must be 2 digits so put in leading 0 if less than ten hours, round off partial hours up or down to an even number. e.g. 8 hours would be coded 08. 7½ hours would also be coded 08.

12. Copy totals for attendance and enrollment on lines 69 and 72. Each number must be three digits so add a leading 0 if necessary to make a three digit number e.g. 43 would be coded 043.

Student Information Questionnaire

13. If the zip code of the home address is San Francisco, 94102 to 94135, enter the last 3 digits in the blank space in the right column next to the line of the zip code. If the zip code of the home address is anything other than 94102 to 94135, then enter the first 3 digits in the blank space.

14. Scan the form to see that the numbers written next to lines A through Q are clear and indicate the student's intention according to the number circled for that question. Especially check that the number responses to Questions F and H correspond to the number circled.

15. Question J will be re-coded to include the student's response to JJ. If the student responded to JJ with a 1 (yes) no change is necessary. It the student responded to JJ with a 2 (no) add 5 to the student's response to J and write your number in its place in the right-hand column. (Remember to write "0" instead of "10" where appropriate). Then cross out the response to JJ so that the keypunch operator will not inadvertently punch it.

16. If the student has not indicted a response to Question Q, place an 0 in the space provided next to that question. Leave blank for all other questions not answered.

17. When you have edited all the forms in a batch, put your initials on lower-left corner of Instructor Class Identification form and then log in on the control sheet for that Center. Enter your count of the number of forms in the batch and the date completed. Sign your initials in the column provided.
